

UML

“Unified modeling language”

SQL

Structured Query Language” is the language to use to “talk” to the database

Relational Databases are: they are SGBD (Systeme de gestion de Base de donnee)
this is the writing language to code

MySQL

Oracle

SQLite

How to login to MYSQL

Download mySQL community server from <https://dev.mysql.com/downloads/mysql/>

Go in terminal (if bash **vim .bash_profile** on the root).

Add **export PATH=\${PATH}:/usr/local/mysql/bin** to the line and :wq

Type **mysql -u root -p**

And type in your SQL password

We can make multiple databases IN the Database server (SQL server)
